

Report of Pennsylvania Mandated Health Screenings

Student: Dhruv Sringari Birthdate: 04/01/2000 Grade: 10

The following is a report of your student's Pennsylvania Mandated Health Screenings. If your child has been referred to a physician for any screening please return the form that was sent home after your physician has filled it out and signed it. If you have any questions or concerns please contact your child's school nurse.

Vision

Date	Grade	Results	Provided By
12/14/2015	10	Pass	

Hearing

Date	Grade	Results	Provided By

Scoliosis

Date	Grade	Results	Provided By

Height and Weight

Date	Grade	In.	Cm.	%	Lb.	Kg.	%	BMI	BMI %
09/08/2015	10	64.50	163.83	16.45	123.00	55.91	41.27	20.78	59.58

Explanation:

WNL - Within Normal Limits: 5.00 percentile to 84.99 percentile

ONL - Outside Normal Limits

Underweight: 0 to 4.99 percentile

Healthy Weight: 5.00 to 84.99 percentile

Overweight: 85.00 to 94.99 percentile

Obese: Equal to or greater than 95.00 percentile

Example: If your child is in the 60th percentile that means that compared to children of the same gender and age, 60% have lower BMI.

BMI-for-age is used for children and teens because of their rate of growth and development. It is a useful tool because:

- ~BMI-for-age provides a reference for adolescents that can be used beyond puberty.
- ~BMI-for-age in children and adolescents compares well to laboratory measures of body fat.
- ~BMI-for-age can be used to track body size throughout life.
